

Hello - I'm writing in response to a CNN article about miscellaneous line-item charges I have been charged on my cell-phone bill. I think they are also misleading and unfair, and it makes it very difficult to calculate my final bill at the end of the month because of all of these charges. I have been charged arbitrary fees by both SBC for my home phone and by AT&T wireless on my wireless bill. Please do whatever you can to force these companies to cover the various regulatory fees in the advertised monthly rate, rather than adding them on stealthily when the first bill arrives.

Thank you,
Karl Brown
